As a result of examination of type-specimens of North American Bruchidae deposited in the Zoologisk Museum, Copenhagen, the Naturhistorisk Riksmuseet, Stockholm, and the Zoological Museum, Moscow, a number of changes in status of names is necessary. These names are involved in current biological and ecological studies, and changes are also necessary for the forthcoming catalog of this family for America north of Mexico.

Acanthoscelides alboscuteatus (Horn), 1873, Trans. Amer. Ent. Soc. 4:334.

Bruchus conspersus Motschulsky, 1874, Bull. Soc. Nat. Mosc. 46:224. **New Synonymy.**

Page 253. **New Synonymy.** I am indebted to Joseph Ewan of Tulane University for sending me a translation of this obscure work in which the honey locust bruchid is unmistakably described.
